

**This folder contains the files accompanying *Chapter 10 of Righting Software*.**

The files correspond to the simple network in Figure 10-4 demonstrating how to calculate the risk of the original network and two decompression points.

The files are:

1. **Figure 10-4 - Original.mpp** – The project file of the original network. The file calculates the floats as shown in Figure 10-4.
2. **Figure 10-4 - Decompressed 10 Days.mpp** – The file calculates the floats in the network of Figure 10-4 with 10 days decompression.
3. **Figure 10-4 - Decompressed 30 Days.mpp** – The file calculates the floats in the network of Figure 10-4 with 30 days decompression.
4. **Figure 10-4 - Original and Decompressed.xlsx**– A spreadsheet that calculates the risk of the original network, as well as with 10 days and 30 days of decompression.
